

↓ (2) Fertilization Programs Available (6 applications) – please choose one option

"The Original" Fertilization & Weed Control Program **Price Per App:** \$ _____ .00

"The Hybrid" Organic based Fertilizer WITH Non-Organic Weed Control **Price Per App:** \$ _____ .00

****Refer to the Fertilization & Weed Control Program for details about options above****

-- TURF IMPROVEMENT APPLICATIONS --

↓ Please check your desired optional application(s)

Spring "Green-up" Application (One-time EARLY spring application) **Price Per App:** \$ _____ .00
 This application is a fast release granular fertilizer (ammonium sulfate) that jump-starts your grass to green-up. This application will be applied shortly after the snow melts, but prior to Application #1 of your chosen program above.

"Gypsum" Application (One-time summer application) **Price Per App:** \$ _____ .00
 This application can help relieve past winter & summer stress that affects grassy areas. The use of Gypsum breaks up compacted soils and strengthens the root structure. The process of loosening up the soil reduces water runoff. Gypsum is a great "organic" fertilizer to help new seed establish and also helps neutralize "dog spot" areas.

Summer Stress Reducer-ORGANIC (One-time summer application) **Price Per App:** \$ _____ .00
 This application is a plant derived organic acid to help with heat stress recovery. It reduces bicarbonates & salts from irrigation water and improves soil structure/unlocks nutrients that are tied up.

"Sulfur" Application (One-time late summer/early fall application) **Price Per App:** \$ _____ .00
 Sulfur is a mineral that plays a critical role in the growth & development of grass. It improves soil health by reducing soil PH levels, increasing nutrient uptake, & promoting root development. It helps prevent disease and assists in breaking up compacted clay - therefore HIGHLY recommended with Fall Core Aeration Service. (see "2026 spring/summer/fall contract")

-- OPTIONAL INSECTICIDE APPLICATIONS --

↓ Please check your desired insecticide(s) - *both are applied upon the same visit*

"Sub-surface" Insecticide Pre-Emergent (One-time summer application) **Price Per App:** \$ _____ .00
 This application helps control pests such as Japanese Beetles, White Grub Larvae, Emerald Ash Borer and many other unwanted insects that grow and feed in your soil. This application is a liquid based treatment to all turf areas. Follow-up post-emergent insecticide applications are available upon request.

"Surface" Insecticide (One-time summer application) **Price Per App:** \$ _____ .00
 This application helps control pests such as Sod Webworms, White Moths, Ticks and other insects that feed on the blades of grass. These kinds of pests hide in the thatch and debris above the soil making them difficult to locate. This application is a liquid based treatment to all turf areas. Follow-up post-emergent insecticide applications are available upon request.

↓ **10% SAVINGS DISCOUNT**

I want to SAVE 10% by pre-paying for the Six (6) Application Program I have chosen above. C N'R will send an invoice upon receiving this contract back (tax will be added). The 10% discount pre-payment SAVINGS only applies to the Six (6) Application Program of your choice above.

****Must sign up for all 6 applications to qualify for the pre-payment discount****

The terms are net **30 days**. A late payment fee of 21% APR is assessed after 30 days. Finance charges are assessed for each 30-day period without full payment of an invoice. Upon selling the home/property, this contract can be terminated on the date of "closing". Fuel surcharges of 2.0% of the total invoice is added each month that fuel prices go above \$2.50/gallon, with an additional 0.5% for each \$0.25 thereafter. By signing this contract, I agree to; personally guarantee payment; understand the charges of all checked off services; I have read the corresponding specifications sheet; I understand all "costs for collections" are recoverable as part of a judgement.
